

Account Login Information

Chromebook login:

When at the login screen of the chromebook there is a button "Add Person" that you will need to click on, then enter the username, our chromebooks will automatically add the @mycsp.org portion, click next and enter the password.

CSP google account login:

All usernames follow this format:

*first initial**last name**@mycsp.org"

All passwords follow this format:

*Capitalized first initial**Capitalized last initial**Student ID*

For example,

If the students name is John Smith with a student ID of 123456 their login info would be the following:

Username: jsmith@mycsp.org

Password: JS123456

There are a few students who are an exception to this, if two people have the same first initial and last name one will have a 1 added to the username.

For example,

If the students name is James Smith, since jsmith@mycsp.org is already taken it would be:

Username:jsmith1@mycsp.org

For any further questions on mycsp accounts feel free to respond to this email.

Classlink/AACPS logins:

AACPS logins will be used for Classlink. They should be in the format SIF@aacps.org with a password being the students birthday in the format YYYYMMDD.

For any further questions on aacps accounts please reach out to the AACPS help desk by phone at 410-222-5135 or e-mail help-desk@aacps.org
